

Entry Level - Simulator Tester

GENERAL SUMMARY: Candidate will be responsible for creating and implementing a test plan to use with an EKB simulator to find faults that may exist in the Signal Access List (SAL) of various US Navy ship classes. Additionally, the candidate will be responsible for updating the SALs as needed to ensure all sensor names and tags are within specific guidelines. Candidate should also be willing to take on new work as challenges present themselves.

LOCATION: Philadelphia, PA

REQUIREMENTS:

- **Ability to obtain a Security Clearance with the DoD**
- B.S. Degree in Computer Science or a related field
- Strong Microsoft Excel skills
